Abstract (en)

[origin: WO2005023581A1] The invention relates to a vehicle seat, particularly a motor vehicle seat, comprising a seat part structure (5), a seat cushion (7), which is placed on said seat part structure (5), and an anti-submarining ramp (11), which is active, at the latest, upon the occurrence of a collision. According to the invention, the anti-submarining ramp (11) can move inside a recess (9) of the seat cushion (7).
