Abstract (en)

[origin: WO2005032927A1] Disclosed is a container ship having a limited length and width in order to be able to navigate through the Panama Canal. Said container ship comprises a hold (4) which allows twelve rows of containers (15) to be accommodated next to each other across the width of the ship and is located in a hull (2) that is provided with a double shell (3). At least one three-dimensional stabilizing device (5) which connects the ship's double shell (3) on one side of the hull (2) to the ship's double shell on the other side of the hull is disposed inside the hull (2).
