Abstract (en)

[origin: WO2005012587A2] The invention relates to an enclosure, having openable and closeable lateral walls and roof surfaces, as well as a sliding door therefor, comprising frontwalls (14A, 14B), at least partially-openable and closeable lateral walls (16A, 16B) and roof surfaces (18A, 18B). According to said invention, at least one of the lateral walls is embodied as a curtain (20A, 20B) which can be wound up at the lower end thereof, which is kept ready by means of an end strip (22A, 22B), guided on both sides thereof, and which can be raised or lowered. When closed, the at least one guided end strip (22A, 22B) is embodied as a profile (P), at least partially forming roof surfaces and having a boundary area, oriented towards at least one lateral wall (16A, 16B), from which the curtain (20A, 20B) is hung in a substantially perpendicular manner.
