Abstract (en)

[origin: WO2005019573A1] The invention relates to a lock for a leaf element (12) that is rotatably mounted in a frame (10). In said lock, a bar (16) that can be locked in position and that extends along one side of the frame (10) or leaf element (12) is pivotally or displaceably fixed on the relevant component. The bar co-operates with an engagement bar, located in the opposite component in a fixed or displaceable manner, and is pivoted or displaced to lock the leaf element.
