Abstract (en)

[origin: FR2858867A1] The indicator has a cylindrical indication unit (2) with a symbolic and/or digital indication unit (25) to indicate number of doses distributed or remaining to distribute from a fluid product distribution device, to a user. An actuating unit moves in translation during each actuation of the device. The actuating unit cooperates with an actuator (1) to transform the translation of the unit into rotation of the actuator. An independent claim is also included for a fluid product distribution device comprising a dose indicator.
