Abstract (en)
[origin: US2005045024A1] A Color-guiding Music Teaching System including practice pad, pitch plates, percussion targets & lesson book assembly and method is disclosed. The teaching method enables young students to learn music much faster than before by creating an association between musical notes, audible pitch, visual appearance and tactile feel. Several devices are provided, ranging from simple striking targets to more complex musical instruments that have visually, possibly audibly, and even possibly tactilely distinct striking targets incorporated or attached thereto to accompany execution of the teaching method.
