Abstract (en)
[origin: WO2004086681A2] A method and a mobile station (1) are introduced for providing access to a wireless local area network. As wireless local area networks (3,4,5) cannot be accessed by a mobile station (1) moving with high speed, the establishment of a connection to the wireless local area network (3,4,5) is subject to a motion value (mv). The motion value (mv) is provided by the mobile station (1) itself or by a services unit (21) of the transport mechanism (2) the mobile station (1) is traveling with.
