Abstract (en)  
[origin: EP1661674A1] The chipping tool has a base body (1) and first and second rows (2, 4) of axially spaced cutters (3, 8). The cutters of the second row are offered different profile cross section from those of the first row. They have a narrower tooth head, and the straight lines from the flanks through the smallest and largest tooth widths form an acute angle.
