Abstract (en)

A burner for a yarn-singeing device, with a housing (1) and a burner insert (2) with a yarn channel (3) and a side slot (4) for loading yarn into the channel, in which the burner insert has an inlet part (8) containing a yarn inlet channel (10) with a smaller cross-section than channel (3) so as to reduce the amount of air entrained with the yarn. An independent claim is also included for a burner as above in which the burner insert (2) has a chimney-like delivery part (6).
