Abstract (en)
The present invention provides a modular floor (1) constructed from floor tiles (2) which are supported by supports (8) resting on a ground surface, wherein the floor tiles are provided on their longitudinal edges with bent flanges (4) which are received in grooves (6) arranged in the upper ends of the supports such that a flange of a first floor tile and a flange of an adjacent floor tile lie in one groove, wherein at least some measure of interspacing is present between flanges lying opposite each other in the groove.
