Abstract (en)

To provide an electronic apparatus provided with a power button with improved work efficiency capable of mounting the power button without the power button coming off. An operation section 11 of a power button 10 is inserted into a hole 3 of a cabinet 2 of a television receiver 1. An engaging convex part 21 of a switch 12 for turning ON/OFF power is inserted into the engaging concave part 13. An engaging projection 14 provided in the switch 12 is engaged with an engaging part 22 of the power button 10 and the power button 10 is attached to the switch 12. Since the engaging projection 14 of the switch 12 is engaged with the engaging part 22 of the power button 10 with the engaging convex part 21 engaged with the engaging concave part 13, it is possible to prevent the power button 10 from coming off the switch 12.
