Abstract (en)

[origin: FR2859895A1] The device has three main receptacles (A,B,C) opening towards top along three respective coplanar openings (1,2,3). The receptacles are of different sizes and contain different types of food for each meal. The volume and size ratios of the receptacles are selected to define balanced food serving with a lower calorie value. A rotary scraper (10) removes excess food from the receptacles.
