Abstract (en)
[origin: US2005059320A1] The device of the present invention provides a backless, strapless bra that provides support and/or cleavage to a wearer's breasts and the components of which are not visible, even when worn with a wide variety of revealing outer garments. A first aspect of the invention provides a backless and strapless bra comprising at least one cup member for supporting a front surface of a wearer's breast, and at least one support member for supporting an underside of a wearer's breast, wherein each cup member is unattached to a support member and any other cup member.
