Abstract (en)

[origin: FR2859366A1] The hanger consists of a straight bar (7) with a hook for suspending it from a rail and a pair of clamps for attaching a skirt or a pair of pants. Each clamp is made from two assembled and spring-loaded metal halves (1, 2) that are attached to the bar by folded U-shaped lugs (3, 4) with holes (5, 6). The lugs on opposite clamp halves are of different sizes, so that the clamps are located mainly to one side of the hanger's vertical axis (A - A').
