Abstract (en)
[origin: WO2005025485A1] The invention relates to an administration form for the oral administration of active substances, vitamins and/or nutrients, comprising a drinking straw (1) provided with a closing device (3) which is impermeable to the active substance formulation, vitamin formulation and/or nutrient formulation (2) and which is permeable to air and to a conveying liquid. The closing device has a standardised thickness and a hydrophobic finish.
