Abstract (en)  
[origin: WO2005023533A1] A blade for creping is described. The blade according to the invention has a ceramic top layer covering the working edge of the blade, as well as the surface upon which the web impacts during creping. The ceramic top layer is a ceramic composition comprising chromia-titania, with a titania content of up to 25 % by weight, and most preferably between 10 % and 15 % titania.
