Abstract (en)

[origin: WO2005023593A1] The invention relates to a covering (18) for the equipment module (16) of a motor vehicle (10) which is longitudinally projected backward with respect to the transversal vertical rear panel (12) of the vehicle (10) and comprises a first wall (28) generally horizontally extending backward from the rear panel (12), a second transversal wall (30) which is arranged above the first wall (28) and inclined thereto. Said inventive covering is characterised in that it comprises a third intermediate wall (38) forming a chamfer which is vertically mounted between the first (28) and second (30) walls and is inclined thereto.
