Abstract (en)

[origin: WO2005026011A1] The invention relates to a plastic screw-on lid (1) for a receptacle, particularly for holding cosmetics. Said lid is formed by a threaded element (3) and by a closure element (5) joined thereto by a film hinge. The invention is characterized in that the threaded element (3) has a end edge ring (8), which points upward when in a working position and which delimits the removal opening (10) with a ring lip seal (9), which is located underneath, made of an elastic material and which points inside the opening, and in that the closure element (5) has a pot bottom part (5a) that, in the closed position, projects into the opening (10), whereby the elastic ring lip seal (9), when the receptacle (1) is in a closed position, is supported in a sealed manner against the outer wall (5b) of the pot bottom area (5a) via an area on the upper edge of the receptacle and via a sealing lip (9a).
