Abstract (en)

[origin: WO2005026205A2] The invention relates to the identification of genetic products expressed in association with tumours and to coding nucleic acids for said products. The invention also relates to the therapy and diagnosis of diseases in which the genetic products are aberrantly expressed in association with tumours, proteins, polypeptides and peptides which are expressed in association with tumours and to the coding nucleic acids for said proteins, polypeptides and peptides.
