Abstract (en)

[origin: WO2005033169A1] The invention relates to a thermoformed soft foam, made from polyurethane, obtained by reaction of polyisocyanates with polymeric polyols to give a polyurethane soft foam with subsequent irreversible thermoforming of the soft foam obtained thus, at temperatures above the glass temperature of the thermoplastic polymers and the use of polymeric polyols to produce a polyurethane soft foam which may be irreversibly formed in moulds at temperatures of 120 DEG C to 250 DEG C.
