Abstract (en)

[origin: WO2005026305A1] The invention relates to dishwasher detergents comprising at least one polymer having cationic monomer units, and at least one anionic polymer which is modified with phosphoric and/or sulfurous groups. The inventive detergents are characterized in that the pH of a 1 % by weight solution of the anionic polymer in distilled water at 20 DEG C is less than pH 6. The inventive detergents have improved rinsing properties.
