Abstract (en)
[origin: WO2005024291A2] A bar of lights (1), of a type comprising: - a light source (3) fitted with a plurality of LEDs (4) (Light Emitting Diodes); - a structure (2) adapted for housing said light source (3) and having an open lateral portion (5) to allow the light beam generated by said light source (3) to come out of said bar of lights (1); - means (12) adapted for controlling the operation of said light source (3); - means (13) adapted for supplying said light source (3); characterized in that: means (9, 10, 14) are provided for dissipating the heat produced by said light source (3), so that said light source (3), said means (12) adapted for controlling said light source (3) and said means (13) adapted for supplying said light source (3) may be integrated within said structure (2).
