Abstract (en)

[origin: WO2005036290A1] The invention relates to a method for generating a system for providing diagnosis information (1, 2, 3), and to a corresponding system. The aim of the invention is to simplify the provision of information for diagnosing technical installations or technical processes. To this end, components (4) pertaining to an automation system (5) and having diagnosis interfaces for providing diagnosis information (1) for diagnosing the respective components (4) are collected in at least one group (6), and the diagnosis information (2) of the respective group (6) is provided by combining the diagnosis information (1) of the components (4) collected in the respective group (6).
