Abstract (en)

The washing fluid supply device has a collecting container (10) with connections (12, 14) for the cleaning fluid, and a compressed air connection (16) on the container, to admit compressed air to drive the fluid towards a spray bar (20). There is an injector (22) in the supply line (18), and the suction inlet of the injector receives a return line (30) from the other end of the spray beam.
