Abstract (en)

The invention relates to an arrangement for guiding a printer carriage (4) along a guiding means (3,7,8), wherein said printer carriage (4) comprises multiple roller bearings (5,9), wherein at least a part of the amount of roller bearings are in rolling contact with at least one running surface (3,7,8) making part of said guiding means (3,7,8). The invention also relates to a printer carriage for use in such an arrangement. The invention further relates to guiding means for use in such an arrangement. Moreover, the invention relates to an inkjet printer provided with such an arrangement.
