Abstract (en)

Device (10) for provision of slit-type elements, e.g. of wood or plastic for furniture items has a support surface for supplying at least an element stack (1') containing strip-type elements (1), a provision assembly (4) for provision of at least one strip-type element from the element stack and a pushing assembly (5) for pushing the stack to the provision assembly. The device also has a supply assembly (2) for automatic delivery of an element stack between the provision assembly and the pushing assembly.
