Abstract (en)
An ironing machine (1) for clothes is described, of the type comprising a frame (2), a fixed mould (8) supported by the frame (2) to receive the garment to be ironed laid out on it, a mould (9) that is mobile towards the fixed mould (8) to come into pressing contact with it for ironing and away from it to free the ironed garment, support and guide means (12) being provided between the frame (2) and the mobile mould (9). The support and guide means (12) comprise an articulated quadrilateral mechanism (14) having a fixed side integrated with the frame (2), a mobile side integrated with the mobile mould (9) as well as a pair of rocker arms (15,19) arranged according to substantially parallel lines when the mobile mould (9) is in contact with the fixed mould (8).
