Abstract (en)

[origin: EP1667286A2] The device has a contact link supported in an insulating housing (5) and including two contact legs. The link is interlockingly held in a housing (2) in usage position under pressing the contact legs on assigned bus-bars. An unlocking device (7) is integrated in the housing (5) to detach the interlock of one or two contact legs. The unlocking device is formed in clamp shape and has two clamp plates arranged parallel to each other.
