Abstract (en)

[origin: WO2005028210A2] A document in form of a booklet consists of a centrally folded cover page (1) as well as of a desired number of paper sheets (2, 3), which are interconnected by means of a seam (4). Furthermore, such document includes a page (20), which contains data, which need to be secured against falsification. A protective layer (5) is placed over the page (6) and just above the said sheet (2) there is a band (6), which consists of a bending-resistant material and is also attached to the document by means of the seam (4). The internal edge (50) of the protective layer (5) may therefore be brought into contact with the said band (6), but not also with the neighboring sheet (2, 3).
