Abstract (en)

[origin: EP1669175A1] The press has a pressing table (2), a pressing unit (5) and a stopper (6) for woods which can be glue-pressed. The stopper is motorizably movable in a direction of the press unit by spindle drives. The spindle drives are drive-connected with a hydraulic motor. The stopper is connected with a carrier, which is drive-connected with the spindle drives. The carrier is guided with sledges at the pressing table. An independent claim is also included for a method of glue-pressing disk-shaped woods at plates.
