Abstract (en)
To provide a medicine-bag printing apparatus provided with a conveying mechanism that can smoothly convey medicine bags and align them. A medicine bag (2) is printed by any one of a plurality of printers (11,12) to be collected in a collecting portion (5) via a conveying route (6,13,14). The printing apparatus is provided with medicine-bag direction converging means (6,14) which convert the direction of medicine bags printed by the respective printers so that printing surface and the printing direction become same.
