Abstract (en)

A waste carbonizing and energy utilizing system (10) comprises a carbonizer (20), a gasifying fusion furnace (30), and a power generation plant (40) for utilizing heat energy. The carbonizer (20) carbonizes waste to generate charcoal. The gasifying fusion furnace (30) incinerates the charcoal, and then the heat generated by the incineration of the charcoal is used for operation of the power generation plant (40). Exhaust heat from the power generation plant (40) is recycled to the carbonizer (20).
