Abstract (en)
[origin: EP1669517A2] The method involves erosion device (6) which is a water jet high pressure cleaning equipment (11). Cleaning equipment is placed under a hood (12) across the sprayed asbestos. Hood is placed at the circulating edge (13) at the surface. Negative pressure is produced by suction water. Suction water is supplied together with asbestos and fed to the filter (16,19,20) as waste water.
