Abstract (en)
The enclosure has a flexible barrier forming unit (15) movably connected to posts (3, 4) by an alarm unit (18), which detects a support on the unit (15). The unit (15) has cables (1, 2) connected with soft nets (16, 17), which are independently connected with the posts by bars (19, 20), such that the nets lower freely downwards by a load for pressuring the cable (2). The cable (2) is at a height of 60 centimeter (cm) from ground.
