Abstract (en)

[origin: EP1669526A2] The lock has a storage lever (9) rotatable around a lever axis and is brought into an engagement position, in which the lever holds a catch (2). The lever is brought in a lifting position to release the latch. The lever is activated into the engagement position by the adjustment of the catch, where the lever, which is in the activated condition, alone, drops into the engagement position, while lifting the latch.
