Abstract (en)
[origin: EP1669691A1] The multi-row radiator (10) comprises a first radiator plate (11) preferably facing the room, and at least one additional radiator plate (21,31) behind it. The radiator plates consist of sheet metal shells between which are support components with openings for the fitting of connecting pieces (13,23,33,43). Preformed components (16,26) are located in the openings of the support components by which the flow of gaseous and liquid media between the radiator plates is purposefully influenced.
