Abstract (en)
[origin: EP1669941A2] The system has a camera (7) to record digitalized image of users of an access control device, where the images are saved with an identification data of a data carrier(8) in a database. A terminal communicates with the database to detect the identification data, where images of users of the carrier with respective identification data are transferred to the terminal to view the image with a controlled user (16) of the carrier.
