Abstract (en)

[origin: WO2005032972A2] The invention relates to a fluid product dispensing head which is intended to be connected to a fluid product dispensing member. The inventive head comprises: a body (1) which defines an outlet channel (131) for the fluid product, a nozzle (2; 2') which defines a dispensing port (21), and a protection cap (3) which is mounted on the body (1) such as to cover at least part thereof. The invention is characterised in that the protection cap (3) is overmoulded onto the body (1).
