Abstract (en)

[origin: WO2005033526A1] The invention relates to a clip-type connection for a covering element (2) that can be fixed to a functional profile (1) or a mounting, complementary recesses and protrusions (4) being provided between the functional profile (1) or mounting and the covering element (2). The invention is characterized in that the recesses or protrusions (4) located on the functional profile (1) are arranged at least in part on a clip-type insert (5) that is integrated in the functional profile (1).
