Abstract (en)
[origin: WO2005029281A2] A system for automatically creating and maintaining a database of information utilizing user knowledge about sales related subjects. Described is an Internet-based system for assisting /motivating a population of users interested in information about certain categories of sales related subjects to automatically maintain the database content and to improve the usefulness and quality of the database information without any substantial management by the website owner-manager. The user opinions are primarily in the form of both comments and ratings of which sales-related subjects best provide assistance in completing a sale. Also a system for permitting users to access selected functions of the system for creating and viewing subjects from within other software applications.
