Abstract (en)
[origin: EP1671883A1] The device has a pre-conditioning station (200) with a tires lot (L) and a station (300) compressing the lot. A package unit (400) has application systems (410, 420) to tension bands (BY, BX) around the lot, by rolling around a horizontal axis (YY') perpendicular to axis (XX'), and by variable pitch helical winding around axis perpendicular to the axis (XX'), while maintaining the lot in compression between conveyors (430, 440). Independent claims are also included for the following: (A) a method for packing lot of tires (B) a packed lot of tires in which covers are arranged.
