Abstract (en)
[origin: EP1672130A1] Drain valve has a float valve housing (2) with an opening (3) for valve seat (4) at the lower end. The upper float (8) rests on adjustable regulating element (10) whereby after partial flushing the regulating element couples with the closing body (5). After the release of full flushing the closing body rests on lower float (9) while regulating element is decoupled with closing body.
