Abstract (en)
[origin: EP1672164A2] A chain stopper (7,107,207,307,407) for attachment to a ball chain (1, 101, 201, 301, 401), having a plurality of balls (3, 103, 203, 303, 403) which are spaced apart along the length of the chain and are interconnected by a plurality of intermediate chain members (5,105,205,305,405) that extend along the length of the chain between adjacent balls; the stopper being adapted to be attached to the chain between two adjacent balls, about an intermediate chain member between the two adjacent balls, and being characterized by a maximum cross-sectional size (MC stopper) that is equal to or less than the size of the maximum cross-section of the balls (MC ball) of the chain.
