Abstract (en)

[origin: WO2005025872A1] Disclosed are methods for verifying printing results, according to which a pattern repeat (3) is first scanned in, whereupon copies (9) included on the pattern repeat (3) are selected, and the selected copies (9) are compared to an original (30). The inventive device for verifying printing results, which comprises a scanner, a data processing device, and a user interface encompassing at least one display unit and an input unit, is provided with a copy recognition module for copies (9) included on a scanned pattern repeat (3). The invention allows a large number of copies (9) to be verified in a reliable and fast manner.
