Abstract (en)
[origin: WO2005036479A2] The invention relates to a security document, especially a bank note, comprising at least one pair of luminescent substances which are associated with each other, consisting of a first and a second luminescent substance which are luminescent in a common emission range outside of the visible spectral range. According to the invention, the emission spectra of the first and second luminescent substance overlap in at least one partial area of the known emission range in such a manner that the emission spectrum of the first luminescent substance is completed by the emission spectrum of the second luminescent substance.
