Abstract (en)  
A vacuum cleaner having a parking device for firmly and securely parking a vacuum cleaner nozzle on the main body of the vacuum cleaner, when storing the vacuum cleaner, is provided. The nozzle parking device for a vacuum cleaner includes a first base (110) disposed at the lowest portion of a main body (100) of the vacuum cleaner, a second base (150) coupled to a top of the first base, an opening (113) defined by a portion of the first base (110), and a parking portion (156) formed on the second base (150) and disposed to lie flush inside the opening (113) when received in the second base (150) for parking an extension tube hook.
