Abstract (en)
A wet-cloth brush (100) for a vacuum cleaner generates reduced vibration and enables a user to check the operation of a wet-cloth board (151, 152) in preferred embodiments. Exemplary embodiments comprise a brush body (110), a fan (120) mounted to the brush body to be rotated by drawn-in air, an eccentric cam (141, 142) mounted to the brush body and operated in association with a power transmitter assembly (131, 132) that transmits rotational power of the fan, and at least two wet-cloth boards (151, 152) separably mounted to the brush body to move along a locus of the eccentric cam.
