Abstract (en)

A combined resealable preservation bag/loose-leaf paper container includes a bag (1; 1a) having two sheet materials (10) four sides (11, 12, 15, 15; 11, 12, 15, 15a) three of which are sealed, leaving an open side (11; 15a). A resealable strip device (14) is mounted on the open side, allowing repeated opening and sealing of the open side. Holes (19) are defined in one of the sealed sides of the bag, allowing the bag to be removably placed into a file folder as a loose-leaf paper container. The bag may further include a permanent sealed section (18) extending from the open side (15a). The permanently sealed section permanently seals the open side of the bag. The permanently sealed section may include a hole (181), forming a handle (182).
