Abstract (en)
[origin: EP1675157A2] The vessel has an internal combustion chamber (3), where the outer contour of the vessel and the combustion chamber follow a boundary having a middle range. The middle range is torus-shaped and has a cut figure at the middle range. An axle has a segment of a circle having a segment radius (r) and whose center of axle is separated by a distance around a turning radius (R). The centre of the circle segment, which form the middle range of the outer contour and the combustion chamber, toward the axle has a distance (z). The axle is between the center of the segment of the circle and the combustion chamber.
