Abstract (en)
The device has a coupling carrier (10) and a covering unit attached to the carrier, where the unit has a clamping section (40) and an operating section that is connected with the section (40). The section (40) is movable through the deviation of the operating section, where an electrical conductor (26) arranged between the unit and the carrier is fixable at the carrier in a clamping manner through the movement of the section (40).
